

## I Ching Readings

I Ching literally means the Book of Changes. It is the most ancient book in China on analysis of the present situation with possible changes in the future. Chinese philosophy advocates the belief that mankind is part of the Universe and that what happens in the near future can be predicted by what is currently in one's mind. What is in one's mind can be transferred into apparently unrelated outcomes of a random experiment. Using the Text of I Ching these outcomes can be interpreted to predict the outcomes of various actions. Tossing coins is one such random experiment. The original text is complex and profound even for the expert. I have extracted the essence of the text and made reference to our daily life experiences. The reading is then easy to understand.

Thanks to people who used my free service for the past year. It has come to a point that I cannot handle this anymore.

Take three coins which show Head on one side and Tail on the other. Concentrate on the subject of interest. For example, you may want to know whether you will be successful in an interview next week. Or you may want to know whether you have any luck in developing a relationship with someone in the near future. Or you may want to know whether your business will improve in the near future. The list is endless.

Transfer your thought to the coins and throw them on the table. Record the result. It will be one of the four:

- HHH All three are heads
- HHT Two heads and one tail (order unimportant)
- TTH Two tails and one head (order unimportant)
- TTT All three are tails

Repeat the experiment six times and record the results

**Joseph Yu B.Sc. 余若愚** was born during the second world war in a small village in South China. He spent his childhood as a country boy and did not receive any formal education until he came to Hong Kong at the age of eleven. A lot of people suggest to him that he should create a story of learning Astrology and Feng Shui in early childhood from a monk as do many a famous Feng Shui Master. He prefers to tell the truth.

Yu studied Mathematics and Physics in the University of Hong Kong in the early 1960's. He abhorred all kinds of superstition and vowed to destroy such absurd beliefs of ignorant people. He then frequented libraries, trying to find fault with Astrology and Feng Shui from ancient books. The deeper he went into the subject, the more excited he became about the rich legacy of ancient Chinese culture.

Whether or not to become a professional astrologer and geomancer or continue in the fields of mathematics and physics, became a constant dilemma. Astrology and Feng Shui have been viewed as superstition by their skeptics. Astrologers and Feng Shui masters have been linked with fraud for centuries.

Someone wrote in his book, "If more knowledgeable men provide true Astrology and Feng Shui services, the ignorant and fake 'professionals' will vanish." Sharing the same view, Yu decided to provide useful services and correspondence courses at an affordable price.

While Joseph Yu was a mathematics teacher after his graduation, he was lucky to have as his neighbor one old Feng Shui master. This old master was very kind to disclose a lot of secrets of the five arts to him even though he was not one of the old master's apprentices.

In one Chinese New Year party at the old master's home, the master said to his disciples, "This young man, though not officially under my care, has learned more than most of you because he has a logical mind and dares to argue with me on various issues."

The old master passed away a few months later. Joseph Yu did not feel comfortable in the company of the disciples of this good master. He is grateful, but circumstances make it impossible to express his gratitude towards the master who passed on to him a lot of invaluable knowledge.
